A New Perspective to E-resource Management

Dr. Sanda Bercovici

Chania, Crete, Greece, 26-29 of May, 2009

Presenter background

- Director , Education and Social Work Library, Hebrew University of Jerusalem

- Lecturer on library management , David Yellin Academic College

- Member, Committee, Israeli Library and Information Center Association

- sandab@savion.huji.ac.il

- http://educlib.huji.ac.il/

האוניברסיטה העברית בירושלים
The Hebrew University of Jerusalem

Hypotheses:

1. As long as books keep being published, there will be a need for **libraries to collect, store and preserve** them.

2. As long as libraries keep being built, there will be a need for **librarians to select, organize and retrieve** the information stored in them.

3. Academic libraries, managed by academic librarians, will continue to play a **key role in new directions in scholarly communication.**

האוניברסיטה העברית בירושלים
The Hebrew University of Jerusalem

…there will be a need for *librarians to* *select, organize and retrieve* the information stored in them...

"Many people start their research in the library…Then, when they click into a good source, such as the right electronic journal, they may leave the library and access it from somewhere else…But **would the student have found that journal without the help of the librarian?"**

"Information Central." *Syracuse University Magazine* (Fall 2004).
http://sumagazine.syr.edu/fall04/features/feature3/

…there will be a need for *librarians*

Librarians can influence *students' web-based information choices …*

"…developing a standardized list of questions for usability testing that would be based on main functions of an academic library Web site and be designed to meet the general information needs of college students and faculty with different levels of the information literacy skills."

Journal of Web Librarianship,v.2,nr.2, 2008
http://www.informaworld.com/smpp/content~content=a903689193~db=all

SFX® is the most widely used link server and the linking solution of choice for over 1,500 libraries worldwide.
SFX provides users with context-sensitive links to article full-text and other library-defined resources including the online public access catalog (OPAC) local holdings, preferred document-delivery suppliers, related Web-based resources and services, local information repositories, and a range of other services.

TDOne Is:

My library homepage •

My authentication point •

My access point to all my resources •

Catalogues –

Journals / e-Journals –

e-Books –

Databases –

My personal workspace •

My first choice for research •

Challenges

Challenge 1 –

"Need to search too many different information resources"

- Search any enterprise internal and external resources from one point of access

Challenge 2 –

"Too many results - How do I find what I really look for?"

- Efficient navigation within search results

Challenge 3 –

"Is this the document I really need?"

- Real time retrieved document analysis

To remember

- Do we really know the user's behavior in the cyber space?
- Do we know enough our users needs?
- How and what are they looking for?
- How may we help them?
